

## HPCL RAJASTHAN REFINERY LIMITED

Joint Venture between HPCL and Government of Rajasthan

CIN NO: U23201RJ2013GOI043865

Regd. Office: Tel Bhavan, Sahkar Marg, Lal Kothi Vistar Jyoti Nagar,  
Jaipur Rajasthan, India 302005.

HPCL Rajasthan Refinery Ltd. (HRRL) is a Joint Venture between Hindustan Petroleum Corporation Limited (HPCL) and Government of Rajasthan (GOR). HRRL is setting up a Greenfield 9 MMTPA refinery cum petro chemical complex at Pachpadra in Barmer district of Rajasthan. HRRL invites proficient and motivated candidates looking for exciting career opportunities to be a part of our growth journey. Interested and eligible candidates can apply for the following vacancies **ONLINE**.

A. POSITIONS & VACANCIES			
Salary Grade/Pay Scale	S/G E5 (₹80000-₹220000)	S/G E6 (₹90000-₹240000)	Total
Maximum Age	42	46	
Min. Experience	12	15	
Civil	1	1	2

## B. IMPORTANT DATES

Commencement of online application	<b>24<sup>th</sup> February 2022</b>	Last date of online application	<b>15<sup>th</sup> March 2022</b>
------------------------------------	--------------------------------------	---------------------------------	-----------------------------------

## C. ELIGIBILITY

Please refer table below for the List of Engineering / Technology Disciplines, eligible to apply

ENGINEERING FUNCTIONS		
Core Function	Discipline/	Prescribed 4 year Full time degrees in Engineering with minimum 60% marks of all semesters/years for UR/OBCNC/EWS candidates and 50% for SC/ST/PwBD candidates.
A. Mechanical		Mechanical, Mechanical & Production
B. Electrical		Electrical, Electrical & Electronics
C. Instrumentation		Instrumentation, Instrumentation & Control, Electronics & Instrumentation, Instrumentation & Electronics, Instrumentation & Process Control
D. Civil		Civil
E. Chemical		Chemical
F. Fire & Safety		Fire Engineering or Fire & Safety Engineering. Diploma in Industrial Safety from AICTE approved institutions in addition to the above-mentioned qualification will be given preference.

## D. JOB DETAILS

### I. Role – Civil : E5 / E6

**Education Qualification:** 4-years full time regular engineering course in Civil Engineering from AICTE approved / UGC recognized University/Deemed University with minimum 60% marks of all semesters/years for UR/OBCNC/EWS candidates and 50% for SC/ST/PwBD candidates.

#### Work Experience

E5	E6
Minimum 12 years of post-qualification relevant work experience in Supervisory role/Executive category in the following	Minimum 15 years of post-qualification relevant work experience in Supervisory role//Executive category in the following

- Supervisory/ Executive/ Managerial Role in Project Execution/ Project Management in Petroleum/ Refining/ Petrochemical/ Chemical/ Fertilizer sectors. Experience as Project Service Providers like Project Management Consultants / LSTK Contractors related to the above sectors shall also be considered.
- From the total experience as per point above, a minimum of 6 years' experience in project execution which should include at least one of the following aspects:
  - Engineering – Preparation of specifications, detail engineering, engineering drawings, basic design aspects, engineering/ document control etc.

- Procurement – Procurement for the project of requisite materials and services, estimation for the tenders, evaluation of the tenders, negotiations with the party, handling commercial disputes and arbitrations.
- Planning – Planning, scheduling, updating the progress and making catchup plans, MIS reports, progress measurement etc.
- Construction - procurement control, resource control, expediting, quality requirements, erection schemes, various construction equipment, work measurements and certification, progress measurement, billing, contract management, safety/statutory requirements etc.

Key Job Responsibilities :

- Engineering
  - Review of the engineering standards for the project.
  - Review and approval of the engineering design basis for the project
  - Review of the front end engineering for the units
  - Review of the detailed engineering, equipment layout, plant layout, overall Site layout.
  - Ensure adherence to the statutory norms at the layout stage.
- Tendering & Procurement
  - Preparation and Review of tender / contract documents, scope of work, tender estimate, finalization of the pre-qualification criteria, finalization of the commercial terms for the project, finalization of the payment terms and schedule for the tender etc.
  - Preparation and Review of Purchase Requisitions / tender documents wherever required and follow-up for the finalization of the Purchase Orders
  - Review of the technical amendments.
  - Review of the technical bids and approval
- Construction
  - Lead the team and ensure completion of the works assigned ensuring adherence to engineering standards, safety, quality, environmental norms, time and cost.
  - Overall control of the project execution plan. Site supervision.
  - Ensuring adherence to specifications / drawings on the job.
  - Ensure overall compliance to safety requirements by contractors and other personnel.
  - Coordinate with site contractors, HRRL depts. like Process, Projects, Fire & Safety, Mechanical, Purchase, Finance, Legal etc. and Construction Supervision consultant for job execution including commissioning and handing over.
  - Ensure maintenance of proper quality control records for site jobs through consultant like cube testing, pile load testing, hydro testing etc. as applicable. Coordinate with third party inspection agencies, if any.
  - Responsible for timely payments to contractors by making material received reports and ensuring proper records of all requisite documentation and necessary cross verification of quality and measurements.
  - Ensure issuance of materials to contractors wherever required. Ensure proper records of issue, receipt & reconciliation of the material.
  - Coordinate with statutory authorities like CCOE, OISD, Factory inspector, Labor inspector etc. as applicable for site execution.
  - Coordinate with security for labor/material entry / exit, gate passes, vehicle movements.
  - Follow up with vendors and contractors for site requirements.
  - Release of site notes to ensure compliance with standards/ engineering drawings.
  - Ensure maintenance of site log books and hindrance registers.
  - Coordinate and implement safety audit items.

- Planning & Monitoring
  - Monitor project network & take corrective action to maintain schedule.
  - Review monitoring reports and make concise MIS for circulation- Monthly report (physical & financial), Weekly report (physical), Quarterly report (physical & financial), Yearly reports.
  - Ensure compliance to Annual plan for the projects.
  - Targets for the financial year (commitment, expenditure, closeouts).
  - Profile of expenditure, closeouts, carryover, CWIP.
  - Ensure proper documentation of commitment, expenditure and closeout databases for all the projects.
  - Highlight areas of concern and reporting to management on regular basis.
  - Ensure adherence to the communication and record keeping protocols.
- Others
  - Preparation, review and justification of the project cost.
  - Take additional responsibilities as and when assigned.
  - Management of the site and personnel assigned
  - Mentoring of the subordinates, their growth and review of their training requirements

## II. Role - Electrical Engineer : E5/ E6

**Education Qualification:** 4-years full time regular engineering course in Electrical Engineering from AICTE approved / UGC recognized University/Deemed University with minimum 60% marks of all semesters/years for UR/OBCNC/EWS candidates and 50% for SC/ST/PwBD candidates.

### Work Experience :

E5	E6
Minimum 12 years of post-qualification relevant work experience in Supervisory role/Executive category in the following	Minimum 15 years of post-qualification relevant work experience in Supervisory role//Executive category in the following

- Executive/Managerial Role at Project sites at Petroleum/ Refining/ Petrochemical/ Chemical/ Fertilizer / Steel/ Power / Infrastructure sector/ Defense/Automobile/Pharma/Railways/any relevant manufacturing sector or Project Service Providers like Project Management Consultants / LSTK Contractors related to the above sectors.
- Experience in erection / installation, Testing & commissioning including troubleshooting of HT & LT power distribution system, equipment like HT/LT motors, substation equipment, start-up devices like VFDs, auto transformers, relay settings and relay coordination, GIS, earthing, lighting, area classifications, flameproof equipment, CPP generation, transformers, switchgears, UPS, cables, industrial illumination system, HVAC, Fire Alarm & Communication. Basic system design, equipment specifications, Engineering for Procurement & Construction, technical evaluation of bids, review of vendor drawing & data.

### Key Job Responsibilities:

- Carryout supervision/ design / drawing activities as per project plan, wherever required outside LSTK scope.
- Prepare/review specifications for various supplies / jobs / equipment in coordination with consultants.
- Prepare/review MTOs & prepare purchase requisitions for various jobs / supplies / equipment.
- Carryout technical review of bids including technical correspondence with vendors.
- Ensure compliance to codes, engineering standards and good engineering practices.

- Ensure incorporation of relevant safety standards/practices.
- Review vendor's fabrication drawings independently or in coordination with consultants.
- Carryout inspection at vendor's shops wherever required.
- Prepare MRRs for receipt of equipment / material.
- Prepare/review drawing like single line diagram, instrument schedules, cable schedules, loop schematics, cable layouts etc. (as applicable) with consultants / HRRL dept.
- Coordinate between Process & Project dept. for identifying and locating tie points /hookups wherever required.
- Maintain proper documentation / drawing records.
- Follow up with vendors for timely delivery of equipments /material.
- Site supervision and ensure adherence to project execution plan.
- Study construction drawings and ensure adherence to specifications / drawings on the job.
- Obtain necessary job permits and ensure compliance to site and personnel safety requirements.
- Coordinate with site contractors, HRRL depts. like Process, Projects, Fire & Safety, Civil, Purchase, Finance, Legal etc., Construction Supervision consultant and state electricity board etc. for job execution including commissioning and handing over.
- Ensure & maintain proper quality control records for site jobs like megger testing, loop checking etc.as applicable.
- Coordinate with third party inspection agencies, if any else carryout necessary job inspection.
- Issue materials to contractors wherever required. Keep proper records of issue, receipt & reconciliation of the material.
- Coordinate with statutory authorities like electrical inspector etc.as applicable, for site execution.
- Coordinate with security for labour /material entry / exit, gate passes, vehicle movements.
- Follow up with vendors for site material requirement.
- Carry out and certify site measurements/job completion and prepare received reports.
- Maintain site log books and hindrance registers.
- Coordinate and implement safety audit items.
- Prepare plant transaction reports.
- Take additional responsibilities as and when assigned.

### III. Role - Instrumentation Engineer : E5/ E6

**Education Qualification:** 4-years full time regular engineering course in Instrumentation Engineering from AICTE approved / UGC recognized University/Deemed University with minimum 60% marks of all semesters/years for UR/OBCNC/EWS candidates and 50% for SC/ST/PwBD candidates.

**Work Experience :**

E5	E6
Minimum 12 years of post-qualification relevant work experience in Supervisory role/Executive category in the following	Minimum 15 years of post-qualification relevant work experience in Supervisory role/Executive category in the following

- Supervisory/ Executive/ Managerial Role in Petroleum/ Refining/ Petrochemical/ Chemical/ Fertilizer sector. Experience as Project Service Providers like Project Management Consultants / LSTK Contractors related to the above sectors shall also be considered.
- From the total experience as per point above, a minimum of 6 years' experience in projects (maintenance projects like one on one equipment replacement shall not be considered) execution which should include at least one of the following aspects:

- Engineering – Preparation of specifications, detail engineering, engineering drawings, basic design aspects, engineering/ document control etc.
- Procurement – Procurement for the project of requisite materials and services, estimation for the tenders, evaluation of the tenders, negotiations with the party, handling commercial disputes and arbitrations.
- Planning – Planning, scheduling, updating the progress and making catchup plans, MIS reports, progress measurement etc.
- Construction - procurement control, resource control, expediting, quality requirements, erection schemes, various construction equipment, work measurements and certification, progress measurement, billing, contract management, safety/statutory requirements etc.

**Key Job Responsibilities:**

- Engineering
  - Review of the engineering standards for the project.
  - Review and approval of the engineering design basis for the project
  - Review of the front end engineering for the units
  - Review of the detailed engineering, model reviews, equipment layout, plant layout, overall Site layout.
  - Ensure adherence to the statutory norms at the layout stage.
- Tendering & Procurement
  - Preparation and Review of tender / contract documents, scope of work, tender estimate, finalization of the pre-qualification criteria, finalization of the commercial terms for the project, finalization of the payment terms and schedule for the tender etc.
  - Preparation and Review of PRs/ tender documents wherever required and follow-up for the finalization of the P.O.
  - Review of the technical amendments, technical bids and approval.
  - Processing the change PR for any time extension, processing the PR for Post Warranty AMC of different instrument systems.
  - Developing list of spares for O&M requirement and advising warehouse for necessary procurement.
  - Initiate procurement plan for attending any emergency/contingent requirement or any work outside the scope of EPCC/PMC
- Construction
  - Lead the team and ensure completion of the works assigned ensuring adherence to engineering standards, safety, quality, environmental norms, time and cost.
  - Overall control of the project execution plan. Site supervision.
  - Ensuring adherence to specifications / drawings on the job.
  - Ensure overall compliance to safety requirements by contractors and other personnel.
  - Frequent site visit to have a close monitoring on the quality, safety and the progress, provide engineering/ commissioning support to operation team during pre-commissioning & commissioning
  - Coordinate with site contractors, HRRL depts. like Process, Projects, Fire & Safety, Civil, Purchase, Finance, Legal etc. and Construction Supervision consultant for job execution including commissioning and handing over.
  - Co-ordination with OEMs, Licensors for checking of interlock/logics during pre-commissioning & Mechanical Run test of equipment.
  - Arranging Interface meeting with EPCC, DCS vendor & other instrumentation Package Vendors to resolve any technical issues.
  - Co-ordination with regulatory board AERB & HRRL Radiation Safety Officer during installation and powering on of Nucleonic Gauges.

- Ensure maintenance of proper quality control records for site jobs through consultant like QAPs, ITPs, ICPs, hydro testing, megger testing, loop checking, format checking, calibration checking, Interlock checking, FAT reports and instrument reconciliation reports etc.as applicable. Coordinate with third party inspection agencies, if any.
  - Responsible for timely payments to contractors by making material received reports and ensuring proper records of all requisite documentation and necessary cross verification of quality and measurements.
  - Ensure issuance of materials to contractors wherever required. Ensure proper records of issue, receipt & reconciliation of the material.
  - Coordinate with statutory authorities like IBR, CCOE, OISD, Factory inspector, Labor inspector etc. as applicable for site execution.
  - Participation in Factory Acceptance Test and Site Acceptance Test for identifying/recording the punch points and ensure compliance of the same before taken into service.
  - Spare management and ensure smooth handover of spares from EPCC/Package Vendor to HRRL Warehouse.
  - Coordinate with security for labor/material entry / exit, gate passes, vehicle movements.
  - Follow up with vendors and contractors for site requirements.
  - Release of site notes to ensure compliance with standards/ engineering drawings.
  - Ensure maintenance of site log books and hindrance registers.
  - Coordinate and implement safety audit items.
- Planning & Monitoring
    - Monitor project network & take corrective action to maintain schedule.
    - Review monitoring reports and make concise MIS for circulation- Monthly report (physical & financial), Weekly report (physical), Quarterly report (physical & financial), Yearly reports.
    - Ensure compliance to Annual plan for the projects.
    - Targets for the financial year (commitment, expenditure, closeouts).
    - Profile of expenditure, closeouts, carryover, CWIP.
    - Ensure proper documentation of commitment, expenditure and closeout databases for all the projects.
    - Highlight areas of concern and reporting to management on regular basis.
    - Ensure adherence to the communication and record keeping protocols.
    - Follow up with vendors for timely delivery of equipment/material
- Others
    - Preparation, review and justification of the project cost.
    - Take additional responsibilities as and when assigned.
    - Management of the site and personnel assigned
    - Change management, proposal engineering, vendor coordination, costing, procurement & installation for attending any emergency or contingent/Statutory requirement outside the scope of EPCC or PMC
    - Developing Systems & Procedures for format checking, taking handover & regular maintenance of instrumentation system
    - Mentoring of the subordinates, their growth and review of their training requirements.

#### **IV. Role – Mechanical – Inspection & Reliability : E5/ E6**

**Education Qualification:** 4-years full time regular engineering course in Mechanical Engineering from AICTE approved / UGC recognized University/Deemed University with minimum 60% marks of all semesters/years for UR/OBCNC/EWS candidates and 50% for SC/ST/PwBD candidates.

**Work Experience :**

<b>E5</b>	<b>E6</b>
Minimum 12 years of post-qualification relevant work experience in Supervisory role/Executive category in the following	Minimum 15 years of post-qualification relevant work experience in Supervisory role//Executive category in the following

• **Reliability**

- Supervisory/ Executive/ Managerial Role in Petroleum/ Refining/ Petrochemical/ Fertilizer sector including 10/12 years of experience for E5/E6 respectively in any one of the following.
- Expert in usage of off line and online vibration monitoring system and interpretation of the same so as to optimize the runtime of the equipment, fault diagnosis, root cause analysis techniques and maintenance recommendation. Thorough knowledge in boroscopic inspection and its acceptance criteria for different gas turbines, thermography and lube oil analysis. Good knowledge online condition monitoring system.
- Sound knowledge in maintenance management of oil & gas turbo machinery packages like gas turbines, centrifugal compressor, pumps and motors.
- Sound knowledge in reliability management of oil & gas turbo machinery packages like gas turbines, centrifugal compressor, pumps and motors.
- Engineering – Extensive experience in the static and rotary equipment engineering, inspection and reliability role.

Key Job Responsibilities:

• **Reliability**

- Accountable to increase the runtime of the equipment and plant. Protect the equipment against functional failures to ensure compliance to annual targets. Responsible for reliability and condition monitoring, assessment and evaluation of asset condition to provide expert advice to operations and maintenance to maximize reliability and availability to assets.
- Responsible to implement Reliability centered maintenance (RCM) regime in the complex.
- Responsible for implementing Total Productive Maintenance (TPM) strategy in the plant.
- Develop and update rotary equipment strategy as leading indicators for reliability, based on RCM.
- Perform mechanical integrity data analysis, review and recommend tasks to mitigate mechanical integrity risk and provide subject matter expertise for mechanical integrity of equipment.
- Provide technical support to the operation team during the entire lifecycle of the plant's compressors, analyzing their performances, operative conditions and boundaries, in order to guarantee reliable and safe operations.
- Troubleshoot compressors failures & performance.
- Lead efficiency and reliability improvement initiatives & upgrading programs & project for compressors.
- Generate and calculate the asset KPIs pertaining to discipline.
- Provide technical solution whenever the machines experience failures, utilizing sound maintenance strategies to analyze, address and rectify the root causes in order to prevent reoccurrences.
- Propose changes in operating modes, or technological improvement, or maintenance strategies implementation, in order to support the company vision of continuous improvement throughout collaboration and people conversations.
- Utilize the best-in-class online monitoring tools and other online maintenance & reliability systems to support decisions in case of failures, or abnormal operating conditions.
- Provide technical support to the maintenance team to optimize the preventive and predictive maintenance strategies.

- Provide mentorship to subordinates. Generate development plans for them, assist them during the entire path of their knowledge growth.
- Project Reliability Assurance
  - Responsible for implementation of Reliability Management System requirements and ensuring the required standards are implemented across complex Engineering activities.
  - Provide advice and guidance to Project Management personnel on the application of the Reliability Management System in relation to Project Execution activities
  - Review specifications keeping reliability regime being implemented in the complex during preparation of proposals.
  - Preparing a program of reliability audits, focusing on the effective implementation of the Root cause failure analysis (RCFA) management system and compliance to the recommendations emanating from the RCFA program.
  - Reviewing all audit reports to verify that the quality management systems are implemented and are compliant with the Contract.
- Engineering
  - Review and approval of the engineering design basis of new equipment as per applicable standards to Petroleum/ Refining/ Petrochemical sector and as per requirement of the reliability program of the complex.
  - Review of the engineering standards for the project.
  - Review and approval of the engineering design basis for the project.
  - Review of the front end engineering for the units.
  - Review of the detailed engineering, model reviews.
  - Investigate and identify solutions where frequent breakdown results in high cost/low mechanical availability of equipment.
- Review of Tender documents
  - Review of tender / contract documents for implementation of the recommendations of the RCFAs and the ongoing reliability regime.

## **Inspection**

- Supervisory/ Executive/ Managerial Role in Petroleum/ Refining/ Petrochemical/ Fertilizer sector in inspection department including 10/12 years of experience for E5/E6 respectively in any one of the following.
- Risk Based Inspection (RBI) – Should have implemented RBI or regularly using the same for inspection activities of the plant at least in a capacity of plant in charge from inspection or RBI in charge from inspection.
- Should have handled inspection as unit in-charge for petrochemical plants like DFCU/PPU/LLDPE/ HDPE unit etc.
- Should have handled refinery inspection as division head or department head level. Should have been responsible for overall plant reliability and compliance to the statutory requirements of factory inspector etc.
- Should be level-2 in NDT and API certified inspector and should have handled inspection activities of a plant as in charge and responsible for the reliability and compliance to statutes for the plant.

Key Job Responsibilities:

- **Inspection**
  - Provide inspection engineering expertise in support of the design, construction, commissioning, start-up and day to day operations as well as turnaround of the Refinery and Petrochemical plant.

- Lay out an inspection regime to ensure the reliability of the plant and to ensure strict adherence to the regime.
- Implement the risk based inspection regime and monitor the implementation and compliance to the RBI based activities.
- Maintain latest developments in inspection/materials and corrosion technology via inter-affiliate technology transfers, network communications and meetings.
- Project quality assurance on project construction and maintenance works to ensure compliance with applicable codes, standards and specifications.
- Perform field troubleshooting in a daily basis or as scheduled.
- Plan and execute major Turnaround & Inspection of the complex.
- Develop and review Mechanical Inspection procedures and best practices. Develop and review Mechanical Inspection Strategy.
- Write recommendations and reports related to Mechanical Inspection Activities.
- Develop and review pre and post-T&Is reports.
- Participate in field Mechanical Inspection, Schedule Inspection and Assessments.
- Review and propose NDT method and inspection procedures.
- Participate in HAZOP Studies review.
- Set KPIs and monitor deployment and performance of Mechanical Inspection programs at Facilities.
- Review performance and KPIs of Mechanical Inspection Programs at Facilities.
- Issue Recommendations to enhance Mechanical Inspection Programs deployment and performance.
- Quality Assurance of Projects
  - Responsible for implementation of Quality Management System requirements and ensuring the required standards are implemented across Home Office Engineering activities in FEED, EPC and PMC projects
  - Provide advice and guidance to Project Management personnel on the application of the Quality Management System in relation to Project Execution activities
  - Review QA requirements during preparation of proposals, as directed by the Manager, Quality Assurance, to assess resourcing / manpower budgets and scheduling of QA activities.
  - Fulfil the role of Project QA Manager as assigned.
  - Preparation, implementation and maintenance of project quality plans, ensuring that all contractual quality requirements are effectively communicated and met.
  - Reviewing of project specific procedures and documents to verify that they comply with the contractual requirements. Monitoring of the application of these procedures to verify compliance with the contract
  - Preparing a program of QA audits, focusing on the effective application of the quality management system and compliance to the project quality plan
  - Reviewing all audit reports to verify that the quality management systems are implemented and are compliant with the Contract.
- Reliability
  - Accountable to protect the equipment against functional failures to ensure that production targets are met. Responsible for reliability and condition monitoring, assessment and evaluation of asset condition to provide expert advice to operations and maintenance to maximize reliability and availability to assets.
  - Develop and update equipment strategy as leading indicators for reliability, based on risk based inspection processes.
  - Perform mechanical integrity data analysis, review and recommend tasks to mitigate mechanical integrity risk and provide subject matter expertise for mechanical integrity of equipment.

- Provide technical support to the operation team during the entire lifecycle of the plant's compressors, analyzing their performances, operative conditions and boundaries, in order to guarantee reliable and safe operations.
  - Utilize knowledge and familiarity with the international standards in order to improve the equipment performance.
  - Generate and calculate the asset KPIs pertaining to discipline.
  - Provide technical solution whenever the machines experience failures, utilizing sound maintenance strategies to analyze, address and rectify the root causes in order to prevent reoccurrences.
  - Propose changes in operating modes, or technological improvement, or maintenance strategies implementation, in order to support the company vision of continuous improvement throughout collaboration and people conversations.
  - Utilize the best-in-class system based monitoring tools and other online maintenance & reliability tools to support decisions in case of failures, or abnormal operating conditions.
  - Provide technical support to the maintenance team to enhance preventive maintenance strategies and checks, along with predictive maintenance strategies and operation-based maintenance checks.
  - Provide mentorship to sub-ordinates. Generate development plans for them, assist them during the entire path of their knowledge growth.
- Engineering
    - Review and approval of the engineering design basis of new equipment as per applicable standards to Petroleum/ Refining/ Petrochemical sector.
    - Review of the engineering standards for the project.
    - Review and approval of the engineering design basis for the project
    - Review of the front end engineering for the units
    - Review of the detailed engineering, model reviews, equipment layout, plant layout, overall Site layout.
    - Investigate and identify solutions where frequent breakdown results in high cost/low mechanical availability of equipment.
    - Ensure adherence to the statutory norms at the layout stage.
  - Tendering & Procurement
    - Responsible for the quality of the products and services being purchased, should monitor the quality aspects of the tender, scope of work, finalization of the QA plans etc.

**V. Role – Mechanical / Mechanical Petrochemical – Maintenance Static : E5/ E6**

**Education Qualification:** 4-years full time regular engineering course in Mechanical Engineering from AICTE approved / UGC recognized University/Deemed University with minimum 60% marks of all semesters/years for UR/OBCNC/EWS candidates and 50% for SC/ST/PwBD candidates.

**Work Experience :**

E5	E6
Minimum 12 years of post-qualification relevant work experience in Supervisory role/Executive category in the following	Minimum 15 years of post-qualification relevant work experience in Supervisory role/Executive category in the following

- Supervisory/ Executive/ Managerial Role in Petroleum/ Refining/ Petrochemical/ Fertilizer sector in field maintenance.
- From the total experience as per point above, a minimum of 10/12 years of experience for E5/E6 respectively in maintenance of plants which should include at least one of the following aspects:
  - Turnaround maintenance Planning– Should have handled a turnaround as unit incharge from planning department. Should have had experience of preparation of worklists, planning all the material required for the turnaround, services planning including raising of tenders and finalizing the same. Monitoring & scheduling of the turnaround and close out.
  - Turnaround Maintenance Execution– Should have handled a turnaround as unit incharge from execution department. Should have had experience of coordination with the vendors, operations for various work permits, planning and drawing of the requisite material, pre fabrication as per the work lists, preparation & setup of temporary facilities. Execution of the turnaround, management of the contractors, monitoring their activities. Reporting of the job progress, follow up with the contractor, payment to the contractor and close out of all jobs.
  - Regular Maintenance – Experience of handling plant maintenance as head of a unit. Responsible for planning all planned, preventive, predictive and breakdown maintenance of various vessels and rotary equipment. Conversant with various concepts in maintenance e.g. TPM, Planned maintenance, predictive maintenance, preventive maintenance etc.

#### Key Job Responsibilities :

- Maintenance
  - Responsible for the reliability of the assigned plant and equipment. To ensure that the correct regime of the plant maintenance is enforced for achieving availability of the plant as per yearly targets.
  - Responsible for the planning of all regular and planned maintenance.
  - To attend to emergency and breakdown maintenance of equipment as required with lowest downtime.
  - To maintain highest safety standards in the assigned area as per rules of the company.
  - Perform field troubleshooting of equipment so that the plant performance is at its design capacity.
  - To handle the major Plant Turnarounds and emergency plant shutdowns.
  - Provide support to maintenance support organizations like Machine Shop or Welding Shop by developing repair procedures or just simply follow up on-going repairs. Provide proposals for repairs or avail any idea that can come up from the execution team from a technical stand point.
  - Participate in facilities audits activities.
  - Review detailed drawings and material specification from Layout Group for piping modifications as requested.
  - Participate in HAZOP Studies review.
  - Responsible for keeping in good working condition various equipment in the plant including all kinds of static and rotary equipment.
  - Plan and execute any Hot Taping works as per requirement.
  - Regular upkeep of fired heaters as required by operations for optimum operation of the heater.
- Engineering
  - Review of the engineering standards.
  - Review and approval of the engineering design basis as required.
  - Review of the detailed engineering, model reviews, equipment layout, plant layout, overall Site layout.
  - Ensure adherence to the statutory norms.

- Tendering & Procurement
  - Preparation and Review of tender / contract documents, scope of work, tender estimate, finalization of the pre-qualification criteria, finalization of the commercial terms for the project, finalization of the payment terms and schedule for the tender etc.
  - Preparation and Review of PRs/ tender documents wherever required and follow-up for the finalization of the P.O.
  - Review of the technical amendments.
  - Review of the technical bids and approval
  
- Projects
  - Lead the team and ensure completion of the works assigned ensuring adherence to engineering standards, safety, quality, environmental norms, time and cost.
  - Overall control of the project execution plan. Site supervision.
  - Ensuring adherence to specifications / drawings on the job.
  - Ensure overall compliance to safety requirements by contractors and other personnel.
  - Coordinate with site contractors, HRRL depts. like Process, Projects, Fire & Safety, Civil, Purchase, Finance, Legal etc. and Construction Supervision consultant for job execution including commissioning and handing over.
  - Ensure maintenance of proper quality control records for site jobs through consultant like X-rays, cube testing, hydro testing, megger testing, loop checking etc.as applicable. Coordinate with third party inspection agencies, if any.
  - Responsible for timely payments to contractors by making material received reports and ensuring proper records of all requisite documentation and necessary cross verification of quality and measurements.
  - Ensure issuance of materials to contractors wherever required. Ensure proper records of issue, receipt & reconciliation of the material.
  - Coordinate with statutory authorities like IBR, CCOE, OISD, Factory inspector, Labor inspector etc. as applicable for site execution.
  - Coordinate with security for labor/material entry / exit, gate passes, vehicle movements.
  - Follow up with vendors and contractors for site requirements.
  - Release of site notes to ensure compliance with standards/ engineering drawings.
  - Ensure maintenance of site log books and hindrance registers.
  - Coordinate and implement safety audit items.
  
- Project Planning & Monitoring
  - Monitor project network & take corrective action to maintain schedule.
  - Review monitoring reports and make concise MIS for circulation- Monthly report (physical & financial), Weekly report (physical), Quarterly report (physical & financial), Yearly reports.
  - Ensure compliance to Annual plan for the projects.
  - Targets for the financial year (commitment, expenditure, closeouts).
  - Profile of expenditure, closeouts, carryover, CWIP.
  - Ensure proper documentation of commitment, expenditure and closeout databases for all the projects.
  - Highlight areas of concern and reporting to management on regular basis.
  - Ensure adherence to the communication and record keeping protocols.
  
- Others
  - Preparation, review and justification of the project cost.
  - Take additional responsibilities as and when assigned.
  - Management of the site and personnel assigned
  - Mentoring of the subordinates, their growth and review of their training requirements

## VI. Role – Mechanical / Mechanical Petrochemical – Maintenance Rotary : E5/ E6

**Education Qualification:** 4-years full time regular engineering course in Mechanical Engineering from AICTE approved / UGC recognized University/Deemed University with minimum 60% marks of all semesters/years for UR/OBCNC/EWS candidates and 50% for SC/ST/PwBD candidates.

### Work Experience :

E5	E6
Minimum 12 years of post-qualification relevant work experience in Supervisory role/Executive category in the following	Minimum 15 years of post-qualification relevant work experience in Supervisory role//Executive category in the following

- Supervisory/Executive/Managerial Role in Petroleum/ Refining/ Petrochemical/ Fertilizer sector.
- From the total experience as per point above, a minimum of 10/12 years of experience for E5/E6 respectively in maintenance of plants execution which should include at least one of the following aspects:
  1. Turbo Machineries (Compressor/Turbine/Pump) – Having prior experience in attending breakdown, routine and planned maintenance activities of turbo machineries i.e. compressor/turbine/pump etc and its auxiliaries in petroleum/refining/petrochemical/fertilizer sector.
  2. Planning – Having prior experience in planning, arrangements and pre- arrangements for attending or executing breakdown and planned outages of turbo machineries. Ensuring 100% availability of resources (procurement of spares and services) and completion of job in approved or planned time frame.
  3. Vibration Monitoring – Having prior experience in review predictive program and condition monitoring administration for the following turbo machineries – Compressor, Turbines, Pumps, Blowers, Gearbox and Motor. Providing troubleshooting support to field engineers/technicians to resolve vibration and performance related issues.

### Key Job Responsibilities :

- Engineering
  - Review and approval of the engineering design basis of new turbo machineries as per applicable standards to Petroleum/ Refining/ Petrochemical sector.
  - Function as technical resource to maintenance groups to direct and recommend problems solutions.
  - Review vendor design documents and co-ordinate with vendors during equipment design and fabrication process.
  - Specify and review drawings and data for large turbo machinery like compressors, turbine etc.
  - Provide technical engineering input on production related problems and complies preventive maintenance routines and spare parts inter-changeability records to sustain plant reliability and operability.
  - Investigate and identify solutions where frequent breakdown results in high cost/low mechanical availability of turbo machineries.
- Tendering & Procurement
  - Preparation and Review of tender / contract documents, scope of work, tender estimate, finalization of the pre-qualification criteria, finalization of the commercial terms for the project, finalization of the payment terms and schedule for the tender etc.
  - Preparation and Review of PRs/ tender documents wherever required and follow-up for the finalization of the P.O.
  - Participate and prepare section budget requirement, control and monitor the expenditure (CAPEX/OPEX).
  - Review of the technical amendments, technical bids and approval.

- Projects
  - Lead the team and ensure completion of the works assigned ensuring adherence to engineering standards, safety, quality, environmental norms, time and cost.
  - Carries out plant punch listing on erection activities, mechanical completion, pre-commissioning and commissioning activities.
  - Ensuring adherence to specifications/standards/procedures/drawings on the job specific to rotating equipments.
  - Ensure overall compliance to safety requirements by contractors and other personnel.
  - Coordinate with site contractors, HRRL depts. like Process, Projects, Fire & Safety, Civil, Purchase, Finance, Legal etc. and Construction Supervision consultant for job execution including commissioning and handing over.
  - Ensure maintenance of proper quality control records for site jobs through consultant like NDT Testing, System 1 integration etc.as applicable. Coordinate with third party inspection agencies, if any.
  - Responsible for timely payments to contractors by making material received reports and ensuring proper records of all requisite documentation and necessary cross verification of quality and measurements.
  - Ensure issuance of materials to contractors wherever required. Ensure proper records of issue, receipt & reconciliation of the material.
  - Coordinate with statutory authorities like IBR, CCOE, OISD, Factory inspector, Labor inspector etc. as applicable for site execution.
  - Coordinate with security for labor/material entry / exit, gate passes, vehicle movements.
  - Ensure good housekeeping at site.
  - Follow up with vendors and contractors for site requirements.
  - Release of site notes to ensure compliance with standards/ engineering drawings.
  - Ensure maintenance of site log books and hindrance registers.
  - Coordinate and implement safety audit items.
  
- Maintenance
  - All level of maintenance, inspection, checks, testing and trouble shooting on compressors, turbines, pumps etc.
  - Responsible for creating and executing planned maintenance activities for all turbo machineries including work scope, resources, materials, tools, drawings and documentation.
  - Ensuring and implementing best maintenance practices for turbo machineries in order to enhance reliability of equipment and avoid forced outages.
  - Performing regular or planned maintenance (including major over haul) of turbo machineries as per condition based monitoring or OEM recommendation.
  - Provide technical solution whenever the machines experience failures, utilizing sound maintenance strategies to analyze, address and rectify the root cause in order to prevent reoccurrences.
  - Utilize the best in class monitoring tools (GE SMART SIGNAL, SYSTEM ONE) and other maintenance tools to avoid forced outages and ensure 100% availability of equipment.
  - Proposed and implement lead efficiency improvement initiatives & upgrading programs & project in the field of rotating equipment.
  - To attend to emergency and breakdown maintenance of equipment as required with lowest downtime.
  - To maintain highest safety standards in the assigned area as per rules of the company.
  - Participate in facilities audits activities.
  - Participate in HAZOP Studies review.
  
- Planning & Monitoring
  - Monitor project network &take corrective action to maintain schedule.

- Execute all arrangements and pre-arrangements for breakdown and planned maintenance activities.
  - Prepares spare parts and services requirement for rotating equipments required during execution of maintenance activities.
  - Liaise with operations/process/planning and other engineering personnel to establish the level of maintenance activities.
  - Review and updates the maintenance program of major turbo machineries using performance, vibration and manufacturer recommended maintenance philosophy.
  - Review monitoring reports and make concise MIS for circulation- Monthly report (physical & financial), Weekly report (physical), Quarterly report (physical & financial), Yearly reports.
  - Ensure compliance to Annual plan for the projects.
  - Targets for the financial year (commitment, expenditure, closeouts).
  - Profile of expenditure, closeouts, carryover, CWIP.
  - Ensure proper documentation of commitment, expenditure and closeout databases for all the projects.
  - Highlight areas of concern and reporting to management on regular basis.
  - Ensure adherence to the communication and record keeping protocols.
- Others
    - Experience in overhauling, trouble shooting, vibration analysis and condition monitoring techniques of rotating equipments.
    - Shall be able to forward creative ideas in situation requiring timely solution to prevent negative impact on plant revenue.
    - Capable of providing logical reasonable and technically sound solutions when problems of rotating equipment encountered during operation of plant.
    - Preparation, review and justification of the project cost.
    - Take additional responsibilities as and when assigned.
    - Management of the site and personnel assigned
    - Mentoring of the subordinates, their growth and review of their training requirements

### VII. Role – Mechanical / Mechanical Petrochemical – Maintenance Planning : E5/ E6

**Education Qualification:** 4-years full time regular engineering course in Mechanical Engineering from AICTE approved / UGC recognized University/Deemed University with minimum 60% marks of all semesters/years for UR/OBCNC/EWS candidates and 50% for SC/ST/PwBD candidates.

**Work Experience :**

E5	E6
Minimum 12 years of post-qualification relevant work experience in Supervisory role/Executive category in the following	Minimum 15 years of post-qualification relevant work experience in Supervisory role//Executive category in the following

- Supervisory/ Executive/ Managerial Role in Petroleum/ Refining/ Petrochemical/ Fertilizer sector.
- From the total experience as per point above, a minimum of 10/12 years of experience for E5/E6 respectively in maintenance which should include the following aspects:
  - Turnaround Maintenance Planning – Making of the work lists, planning for material, services, procurement of the planned material and services, ensuring timely delivery, arranging for emergent material and services, reconciliation and close out of the turnaround. Planning, scheduling, updating the turnaround progress and making catchup plans, MIS reports, progress measurement etc.

Key Job Responsibilities :

- Planning
  - Preparation and Review of work lists from all stake holders
  - Plan for all the material and services requirement as per drawing and site conditions
  - Review of the engineering drawing and reference of engineering standards for the contract.
  - Conduct the turnaround meetings to finalise the work scope and preparations
- Tendering & Procurement
  - Preparation and Review of tender / contract documents, scope of work, tender estimate, finalization of the pre-qualification criteria, finalization of the commercial terms for the project, finalization of the payment terms and schedule for the tender etc.
  - Preparation and Review of PRs/ tender documents wherever required and follow-up for the finalization of the P.O.
  - Review of the technical bids and approval
  - Followup for timely delivery of the material and coordinate for the delivery of services at site.
  - Closure of the contracts post work
- Monitoring
  - Make and Monitor network chart & take corrective action to maintain schedule.
  - Review monitoring reports and make concise MIS for circulation- Monthly report (physical & financial), Weekly report (physical), Quarterly report (physical & financial), Yearly reports.
  - Ensure compliance to Annual plan.
  - Targets for the financial year (commitment, expenditure, closeouts).
  - Profile of expenditure, closeouts, carryover, CWIP.
  - Ensure proper documentation of commitment, expenditure and closeout databases.
  - Highlight areas of concern and reporting to management on regular basis.
  - Ensure adherence to the communication and record keeping protocols.
- Others
  - Preparation, review and justification of the TA/project cost.
  - Take additional responsibilities as and when assigned.
  - Mentoring of the subordinates, their growth and review of their training requirements

### VIII. Role – Mechanical - Project & CES : E5/ E6

**Education Qualification:**4-years full time regular engineering course in Mechanical Engineering from AICTE approved / UGC recognized University/Deemed University with minimum 60% marks of all semesters/years for UR/OBCNC/EWS candidates and 50% for SC/ST/PwBD candidates.

**Work Experience :**

E5	E6
Minimum 12 years of post-qualification relevant work experience in Supervisory role/Executive category in the following	Minimum 15 years of post-qualification relevant work experience in Supervisory role//Executive category in the following

- Supervisory/ Executive/ Managerial Role in Petroleum/ Refining/ Petrochemical/ Chemical/ Fertilizer sector. Experience as Project Service Providers like Project Management Consultants / LSTK Contractors related to the above sectors shall also be considered.

- From the total experience as per point above, a minimum of 10/12 years of experience for E5/E6 respectively in projects (maintenance projects like one on one equipment replacement shall not be considered) execution which should include at least one of the following aspects:
  - Engineering – Preparation of specifications, detail engineering, engineering drawings, basic design aspects, engineering/ document control etc.
  - Procurement – Procurement for the project of requisite materials and services, estimation for the tenders, evaluation of the tenders, negotiations with the party, handling commercial disputes and arbitrations.
  - Planning – Planning, scheduling, updating the progress and making catchup plans, MIS reports, progress measurement etc.
  - Construction - procurement control, resource control, expediting, quality requirements, erection schemes, various construction equipment, work measurements and certification, progress measurement, billing, contract management, safety/statutory requirements etc.

Key Job Responsibilities :

- Engineering
  - Review of the engineering standards for the project.
  - Review and approval of the engineering design basis for the project
  - Review of the front end engineering for the units
  - Review of the detailed engineering, model reviews, equipment layout, plant layout, overall Site layout.
  - Ensure adherence to the statutory norms at the layout stage.
- Tendering & Procurement
  - Preparation and Review of tender / contract documents, scope of work, tender estimate, finalization of the pre-qualification criteria, finalization of the commercial terms for the project, finalization of the payment terms and schedule for the tender etc.
  - Preparation and Review of PRs/ tender documents wherever required and follow-up for the finalization of the P.O.
  - Review of the technical amendments.
  - Review of the technical bids and approval
- Construction
  - Lead the team and ensure completion of the works assigned ensuring adherence to engineering standards, safety, quality, environmental norms, time and cost.
  - Overall control of the project execution plan. Site supervision.
  - Ensuring adherence to specifications / drawings on the job.
  - Ensure overall compliance to safety requirements by contractors and other personnel.
  - Coordinate with site contractors, HRRL depts. like Process, Projects, Fire & Safety, Civil, Purchase, Finance, Legal etc. and Construction Supervision consultant for job execution including commissioning and handing over.
  - Ensure maintenance of proper quality control records for site jobs through consultant like X-rays, cube testing, hydro testing, megger testing, loop checking etc.as applicable. Coordinate with third party inspection agencies, if any.
  - Responsible for timely payments to contractors by making material received reports and ensuring proper records of all requisite documentation and necessary cross verification of quality and measurements.
  - Ensure issuance of materials to contractors wherever required. Ensure proper records of issue, receipt & reconciliation of the material.
  - Coordinate with statutory authorities like IBR, CCOE, OISD, Factory inspector, Labor inspector etc. as applicable for site execution.
  - Coordinate with security for labor/material entry / exit, gate passes, vehicle movements.

- Ensure good housekeeping at site.
- Follow up with vendors and contractors for site requirements.
- Release of site notes to ensure compliance with standards/ engineering drawings.
- Ensure maintenance of site log books and hindrance registers.
- Coordinate and implement safety audit items.
- Planning & Monitoring
  - Monitor project network & take corrective action to maintain schedule.
  - Review monitoring reports and make concise MIS for circulation- Monthly report (physical & financial), Weekly report (physical), Quarterly report (physical & financial), Yearly reports.
  - Ensure compliance to Annual plan for the projects.
  - Targets for the financial year (commitment, expenditure, closeouts).
  - Profile of expenditure, closeouts, carryover, CWIP.
  - Ensure proper documentation of commitment, expenditure and closeout databases for all the projects.
  - Highlight areas of concern and reporting to management on regular basis.
  - Ensure adherence to the communication and record keeping protocols.
- Others
  - Preparation, review and justification of the project cost.
  - Take additional responsibilities as and when assigned.
  - Management of the site and personnel assigned
  - Mentoring of the subordinates, their growth and review of their training requirements

## **CES**

- Supervisory/ Executive/ Managerial Role in Petroleum/ Refining/ Petrochemical/ Fertilizer sector including 10/12 years of experience for E5/E6 respectively in any one of the following.
  - Engineering – Preparation of specifications, detail engineering, engineering drawings, basic design aspects, engineering/ document control etc.
  - Design – Detailed Design including preparation of Engineering drawing of mechanical equipment like Pressure vessels, Columns, Heat Exchangers, Tanks, Furnaces, etc. and Piping design and support system as per Codes / Standards and Stress Analysis. Trouble-shooting engineering activities like vibrations, support system modifications, in-situ repair procedure, etc. of Mechanical equipment.

### **Key Job Responsibilities :**

- Engineering
  - Review of the engineering standards for the project.
  - Review and approval of the engineering design basis for the project
  - Review of the front end engineering for the units
  - Review of the detailed engineering, model reviews, equipment layout, plant layout, overall Site layout.
  - Ensure adherence to the statutory norms at the layout stage.
- Design
  - Engineering support to operating and maintenance requirements like Engineering Drawings for revamp, new facilities including equipment and piping.
  - Review and approval of Design documents and vendor drawings.
  - Drawing assistance for maintenance work.
  - Preparation of specifications for Mechanical equipment and Piping bulk materials.
  - Review of Stress Analysis of Piping.
  - Troubleshooting assistance during erection, maintenance and operation of equipment.

- As-built drawings preparation, Documentation updating and storage.
- Statutory compliance and modifications in facilities to meet guidelines.

### IX. Role – Chemical (including QC)

**Education Qualification:** 4-years full time regular engineering course in Chemical Engineering from AICTE approved / UGC recognized University/Deemed University with minimum 60% marks of all semesters/years for UR/OBCNC/EWS candidates and 50% for SC/ST/PwBD candidates.

#### Work Experience applicable for roles in Grade E5/E6

E5	E6
Minimum 12 years of post-qualification relevant work experience in Supervisory role/Executive category in the following	Minimum 15 years of post-qualification relevant work experience in Supervisory role//Executive category in the following

#### Discipline: Projects-Process

- Supervisory/Executive/Managerial Role in Petroleum Refining/Petrochemical/Chemical/Fertilizer sector. Experience as Project Service Providers like Project Management Consultants/LSTK Contractors related to the above sectors shall also be considered.
- From the total experience as per the table mentioned above, a minimum of 10/12 years of experience for E5/E6 respectively in carrying out the activities listed below. Candidates having exposure to Refining units will be preferred for handling Refinery units, whereas, candidates having exposure to Petrochemical units especially Ethylene cracker, Polyethylene, Polypropylene units will be preferred for handling Petrochemical units of Projects-Process discipline.
- Preparation and review of process design basis for the project
- Review of the front end engineering for the units
- Preparation/review of the detailed engineering documents
- Preparation/review of PFR, DFR, P&ID/BDEP/Process Package
- Participation/review of Hazop Study and Risk Analyses.
- Exposure to simulation software like Aspen/ HYSYS, HTRI, Flarenet, PIMS etc. is desirable.
- Preparation/review of process specifications of equipment for large projects in a continuous process industry like petroleum refinery, petrochemicals, fertilizer units, or in Consultancy Services Company executing large/medium size projects in Petroleum Refinery, Petrochemicals or Fertilizer units.
- Experience of process assistance during project execution including pre-commissioning checks, commissioning, checking and ensuring installed facilities as per design specifications, start-up and guarantee test run of new units, trouble shooting, coordination with PMC/Licensors, External Agencies etc.
- Experience of obtaining various statutory approvals of a project, plant 3D, DCS graphics and DCS FAT during detailed engineering of project, etc.
- Familiarization/conversant with the engineering standards like API, OISD etc. and other statutory safety requirements/guidelines.
- Participate in Internal/External safety audit of new projects.
- Handling of catalysts and chemicals procurement activities.
- Supervising Quality Control / Laboratory Units.

## X. Role - Fire & Safety : E5/E6

### Education Qualification: -

#### Essential:

- Full time regular BE (Fire Engg) from NFSC Nagpur or Equivalent (B.Tech in Fire Engineering or Fire & Safety Engineering from AICTE approved / UGC recognized University / Deemed University.)
- Candidates belonging to UR, EWS and OBCNC category should have secured minimum 60% marks ( of all semesters) in qualifying degree examinations, relaxed to 50% ( marks of all semesters) for SC/ST candidates.
- Candidates having Advanced Diploma in Industrial Safety from AICTE approved institutions.

#### Desired:

- **Qualification:-** Post Graduation in Fire & Safety or Chemical or Operation Management or Equivalent.

### Physical Fitness (Minimum Criteria):

- For Male- Height: 165 CM, Weight: 50 Kg, Chest: Normal: 81 CM, Expanded: 86.5 CM.
- For Female - Height: 157 CM, Weight: 46 Kg
- Eyesight normal (6/6 in both the eyes; without glasses), color vision normal and Free from -- Vertigo problem, disease of heart/lungs/kidney, abnormal blood pressure, Knock Knee, Flat Feet, Squint eye and stammering. Candidate must be in good mental and bodily health and free from any physical defect.

### Work Experience :

#### Essential:

- Minimum 12/ 15 years of post-qualification experience in Fire & Safety Department of oil & Gas industry, Petroleum Refining, Petrochemical, Fertilizers & Chemical manufacturing etc.
- **Experience in Special Skill:** -- Incident prevention and emergency handling in oil and Gas industry.
- Experience in Fire Fighting operations & system maintenance.
- Operation of firefighting vehicles.
- Handling safety related jobs like investigation analysis, safety inspection, job safety analysis, shutdown safety, construction safety, conducting safety meetings/ audits, conducting mock-drills, fire & safety training in an Oil & Gas, Exploration, Petroleum Refining, Petrochemical, Chemical manufacturing etc.

### Key Job Responsibilities:

- The prime role of the Head of Fire & Safety Department is to provide strong executional leadership to ensure accident free Refinery, ensure emergency preparedness, safety compliance, provide safety support to stakeholders and ensure availability of Fire & Safety equipment for emergency handling all the time.

### Fire & Safety Related Jobs :

- Act in advisory capacity on all matters related to safety for guidance to Management, all departments & employees
- Lead in emergencies as per Emergency Response & Disaster management Plan (ERDMP) onsite and off site emergencies.
- Ensure upkeep and availability of all Fire & safety equipment's including fire vehicles, fire protection systems, fire & safety equipment /Systems.
- Perform activities that will stimulate & maintain employees interest in Safety, Health, environment
- Ensure updating of safe work procedures, SHE tender guidelines, policies.
- Ensure compliance of OISD standards and other statutory norms (e..g. Factory Act, BOCW Act etc.)

- Resolve all Fire & Safety related issues in all departments/locations.
- Ensure strict compliance to safety procedures at all times by monitoring safety activities at all levels
- Organize regular trainings, safety audits, departmental meetings, work-shops, seminars etc.
- Ensure regular Fire & safety training for Refinery employees & contract workers.
- Investigate incidents & suggest remedial measures/corrective actions
- Organize Mock drills as per Emergency Response & Disaster Management Plan in Refinery.
- Ensure carrying of JSAs, Scaffolding certification. Ensure availability of safety equipment
- Ensure updating of all Safety Manual, Fire Protection Manual, ERDMP Manuals etc
- Follow on various committee recommendations for compliance.
- Ensure implementation of Safety Audits and Hazop recommendations for new projects.
- Participate in Management committees and Task force
- Prepare MIS and statutory reports.
- Take on additional responsibilities as and when assigned
- Supervise, evaluate and develop section members
- Ensure checking of work site permits to ensure safety compliance.
- Periodic review and Upgradation of Fire Protection Systems & equipment's
- Ensure firefighting and ERDMP training for employees, workers, CISF and others.
- Conduct mutual aid meetings/drills with neighbouring industries.
- Participate in Management committees and Task force
- Take on additional responsibilities as and when assigned
- Supervise, evaluate and develop section members
- Ensure reliability of emergency equipment's & fire protection & Prevention systems .
- Coordinate with statutory authorities for Fire & Safety issues.
- Ensure strict compliance to safety procedures at all times
- Follow up on various committee recommendations

**Note: For role I to X**

**Project Service provider would mean the EPMC consultants handling single job of project worth of more than Rs. 25 crore and EPC / LSTK consultants / contractors handling single job of project worth of more than Rs. 50 crore, which has been in operation for past 5 years. Last published Balance Sheet under self-certification maybe asked as and when required. Candidates who are working with such organizations on third party payroll are also eligible to apply.**

### **XI. Role – Human Resources : E5/E6**

- Educational Qualification: Two-years full time, Post-graduate Degree in HR /Personnel Management / Industrial Relations/Psychology or Masters in Business Administration (MBA) with specialization in HR/Personnel Management from AICTE approved / UGC recognized institute / university. Candidates belonging to UR, EWS and OBCNC category should have secured minimum 60% marks ( marks of all semesters) in qualifying degree examinations, relaxed to 50% ( marks of all semesters) for SC/ST/PwBD candidates.
- 
- Work Experience:
- Minimum 12/15 years of work experience for E5/E6 respectively in following:
- 
- Experienced Professional with indepth knowledge in all matters concerning HR department.
- Excellent knowledge of Labour Legislation and Regulations

- Through knowledge of human resource management principles and best practices
- Knowledge of data analysis and reporting
- Hands on experience in HR technology tools, process and systems, HR analytics, knowledge of ERP systems.
- Experience in Organizational Development.
- Excellent organisational and Leadership skills
- Excellent written and oral communication, interpersonal skills, negotiation skills and influencing skills
- 
- Key Job Responsibilities:
- 
- Develop and implementing HR strategies and initiatives aligned with the overall business strategy
- Develop and monitor overall HR strategies, systems, tactics and procedures across the organisation
- Develop Policies and Processes for a variety of HR Matters such as compensation, benefits, recruitment and selection, performance appraisals, succession planning, Training and development etc.
- Monitor adherence and compliance of Labour Laws and maintain relations with Statutory authorities.
- Support current and future business needs through, development, engagement of human Capital.
- Develop and Implement Learning & Development framework from assessment of Training Needs to imparting of Training to enhance the efficiency and effectiveness of the Human Capital.
- Responsible for all HR Management and development (including recruitment and selection policy / practices, discipline, grievance, mentoring, salary and compensation. Training and development, succession planning, driving performance appraisals, effective handling of employee grievance.
- Develop strategies to identify, attract and hire top quality talent in the organization.
- Maintain knowledge of trends, best practices, regulatory changes, and new technologies in human resource, talent management and Labor Laws
- Develop and implement Reward and Recognition Strategies
- Leverage HR Tools, Analytics, and Technology to develop, assess and build an Organizational Culture in sync with Organizational Objectives.

## XII. Role – Chartered Accountant: E5/E6

**Educational Qualification:** Candidates should be Qualified Chartered Accountant (CA) from Institute of Chartered Accountants of India (ICAI) with 50% marks. Candidates applying for the post should be in possession of C.A. professional qualification completed in all respects at the time of applying for the post including completion of mandatory Article ship Training required for award of C.A. qualification.

**Work Experience:** Minimum 12/15 years of experience for E5/E6 respectively of post-qualification work experience in the field(s) of Finance/Accounts/Taxation/Funds Management/ Cost Accounting/Auditing etc. The articulated training /practical training, which are integrated to the curriculum of respective institution, shall not be considered as valid experience for this purpose.

Key Job Responsibilities:

- Review/Approval of Accounting Vouchers
- Management of Financial Statements meeting Accounting Standards
- MIS for Board of Directors / Senior Management
- Funds/Banking & Working Capital Management
- Handling Internal /Statutory/Govt. Audits etc.

- Handling Pricing of Products
- Banking & Treasury Functions
- Project Financial Appraisal/ Project accounting
- Compliance to Direct Taxation including Assessment activities
- Compliance to Indirect Taxation including Assessment activities
- Responsible for Statutory Compliances including Income Tax, GST, Customs etc.
- Management of Payments to consultants, vendors, contractors, sub-contractors, suppliers
- Fixed Assets Accounting / Capitalization of Assets
- Inventory/ Stock Accounting
- Trade receivables, trade payables, assets accounting etc.
- Finance Assistant to Procurement activities

### XIII. Role – Information Systems - E5/E6

- **Educational Qualification:** 4 years Full time B.E. / B.Tech in the discipline of Electronics / Telecommunications / Electronics & Telecommunications / Computer Science / Information Technology  
OR  
Three years full time course in Masters in Computer Applications (MCA) / Masters in Computer Science (MCS)  
OR  
Two years full time course in Masters in Business Administrations (MBA) / Masters in Management Studies (MMS) with Information Technology or Systems or Computer Science as specialization.  
  
Any of the above qualification must be from AICTE approved / UGC recognized institute / university. Candidates belonging to UR, EWS and OBCNC category should have secured minimum 60% marks (marks of all semesters) in qualifying degree examinations, relaxed to 50% (marks of all semesters) for SC/ST/PwBD candidates.

**Desirable:** M. E./M. Tech in Engineering for candidates with Bachelor's Degree in Engineering/ Technology.

**Work Experience:** 12 / 15 year experience for E5/E6 Grade respectively in the relevant field with exposure in Application Development, Networking, System Analysis and Design, Efficiency in Server Administration, Vendor Management, ability to handle Medium/ Large scale IT projects.

Skill Set	Area
Operating System /Platforms	Windows/Linux/OS400/Unix/ VMWare
Networking	LAN/WAN/Wireless using CISCO/Nortel Technologies/VSAT
DBA (RDBMS)/BI	Oracle/SQL Server/DB2/ OBIEE
Middle ware	Application servers (Apache, WebSphere, Tomcat)
Security	IPS/IDS/Firewalls / PKI/ Identity Management
Messaging & Collaboration	Exchange/MOSS
Application Development	Dot Net Technologies/ ASP/JSP/ Visual Basic/C/Visual C++/Share Point Services

Key Job Responsibilities:

- **Establishing and Maintaining Network Infrastructure** by designing system configuration, directing system installation and defining, documenting and enforcing system standards.
- Maximizing network performance by scheduling upgrades and collaborating with network architects/vendor on network optimization.
- Oversee the financial aspects of their IT team or dept., including purchasing, budgeting & budget review.
- System Analysis Design, implement and enforce the policies, procedures and best industrial practices.
- Should have a strong command of project management principles, procedures and best practices.
- Direct operational IT planning, including planning IT projects and the allocation of Manpower resources.
- Sourcing and implementing new security solutions to better protect the organization by Conducting proactive research to analyze security weaknesses and recommend appropriate strategies
- Liaising with vendors & contractors to implement security, infrastructure and network solutions
- Documenting security certification and Maintaining all the software and hardware in relation to security
- Administering firewall environments in line with IT security policy and configure routing and switching equipment, hosted IP voice services and firewalls
- Undertaking capacity management and audit of IP addressing and hosted devices within data centers
- Managing, troubleshooting, licensing, and updating hardware and software assets.

#### XIV. Role - Legal: E5/E6

**Educational Qualification:** 3-years full time course in law after graduation or 5 years course in law after 12th Standard from AICTE approved / UGC recognized University/Deemed University. Candidates scoring minimum 60% in all the semesters/years for UR/OBCNC/EWS candidates (55% for SC, ST & PwBD candidates) in the LL.B. degree (as applicable) are only eligible to apply.

**Work Experience:** Minimum 12 /15 years' experience for E5/E6 Grade respectively as a practicing Advocate or working in a reputed Law Firm or Company. For all candidates, the experience shall be counted post qualification of LL.B. and for practicing Advocates, the experience must be after enrolment in the Bar Council, post qualification.

Experience should preferably relate to providing advice of legal issues pertaining to interpretation or devising legal strategy, handling litigation and arbitration matters, drafting of Agreements/contracts, drafting of pleadings to be filed before Court/Arbitration, briefing Counsel, etc. It should substantially cover the law relating to Contracts, Building & Construction, Sale of Goods, Transfer of Property, Infrastructure, Insolvency & Bankruptcy, Intellectual Property, Oil and Gas, and Consumer Protection. Experience in oil and gas industry and/or experience handling high value EPC projects is desired and will be an advantage. Candidates should possess excellent written/verbal communication skills in both Hindi and English languages. Proficiency in reading and writing in any one or more Scheduled language (as per the Constitution) in addition to English and Hindi is preferred.

**NOTE:** Candidates are required to submit an experience certificate from the organization in which they are/were working. In case of practicing advocate, the certificate should be from the State Bar Council, a Senior Advocate, or a Law Firm, accompanied with a copy of the enrolment certificate with the Bar Council. Only full-time work experience will be considered from the date of registration with Bar Council and/or date

of joining in employment, as applicable. Internships during continuation of LLB program (or any other full time studies) will not be considered as experience.

**Key Job Responsibilities:**

- Providing legal advice and support on a wide range of legal activities covering issues arising out of various applicable laws, Government Policy and usage of trade.
- Advising on legal documentation related to refinery/marketing activities of the company with a proper understanding of the main terms and conditions of Loan Agreements, Licensing Agreements, Guarantee Agreements, Construction and Supply Agreements, EPC/LSTK Contracts and other typical contracts used by the refining and petrochemical industry.
- Advising on general business law issues and managing the legal issues of all areas of the company, including but not limited to commercial matters, corporate matters, procurement, safety & security, etc.
- Represent the department as required in liaison with the business units.
- To assist in compliance of business operations with relevant laws and regulations.
- To pro-actively create, spread and maintain legal awareness amongst all employees of the Company for ensuring compliance with relevant laws and regulations.
- Cooperate with the other members of the legal department and increase its efficiency.
- Draft and finalize pleadings, agreements, various deeds & documents and add value to all legal matters.
- Draft, review, negotiate and finalize the contract conditions.
- Defend/ respond to the claims put up by any contractors.
- Develop the strategy for filing and defending cases.
- Provide sound legal opinion/advice and respond to queries quickly.
- Briefing and co-ordination with Lawyers and attend court hearings.
- Ensure that all cases are filed /defended well within the limitation period and there is timely submission of all pleadings and documents.
- Improve domain skills and share knowledge and information with team members.
- Keep updated on recent trends in the legal front.
- Handle arbitration cases, verify title documents, conduct reviews and training.
- Maintain a data base of all the litigation and sensitive legal issues of the Company.
- Give periodic reports to the Management when required about pending cases/ arbitrations.
- Ensure that there is minimum litigation and arbitration.

**E. EMOLUMENTS**

<b>Salary Grade</b>	<b>Pay Scale</b>	<b>Designation</b>	<b>Cost to Company (CTC) Approx.</b>
E5	80000-220000	Manager	20.83 lakhs
E6	90000-240000	Sr. Manager	23.44 lakhs

The candidates will be offered minimum base level of pay and the compensation will include Basic Pay, Dearness Allowance, HRA and other applicable allowances as per the company policy.

## F. PROBATION

The Selected Officers will be on probation for 1 year from the Date of Joining. For confirmation in service, the officers have to fulfill various parameters as per the company policy.

## G. PLACEMENT / POSTING

Posting/ Assignment can be in any Division/Department of the HRRL at any place in the country and the services thereafter will be transferable as per the requirement. These positions may involve working in shift duties including night shifts. Selected candidates may also be posted / assigned outside HRRL in India or abroad.

## H. SHORTLISTING & SELECTION METHODOLOGY

Candidates fulfilling all eligibility criteria based on scrutiny of the application and resume submitted in the online application, will be considered for further selection process i.e. Personal Interview. In the event of number of applications being large, the Company will adopt shortlisting criteria to restrict the number of candidates to be called for the interview. The shortlisting criteria will be based on any or all of the criteria i.e. higher relevant experience, higher qualification etc.

The Shortlisting methodology will be hosted on the website [www.hrri.in](http://www.hrri.in) prior to commencement of Selection Process.

Interview will comprise of both Technical and Behavioral.

A category wise merit list of scores will be drawn for all the candidates who qualify as per short listing criteria .

## I. PRE-EMPLOYMENT MEDICAL EXAM

Candidates selected in interview will be referred for pre -employment medical examination. Reference for a medical examination does not mean final selection. Discipline-wise and category-wise final merit list will be drawn for medically fit candidates. Offer of appointment would be extended subject to being declared as Medically Fit by HRRL designated Physician and fulfilment of eligibility criteria w.r.t Academic Qualification, Age, Work Experience, NOC, Caste Certificate, relieving letter from previous employer etc. as may be applicable.

## J. CONCESSIONS AND RELAXATIONS

- a. Reservation of posts for **SC, ST, EWS, OBCNC** and **PwBD** (Persons with Benchmark disabilities –with degree of disability 40% or above) will be as per presidential directives. Category-wise Vacancy Distribution is as given below:

Grade	Category					Total
	UR	EWS	OBC-NC	SC	ST	
E5	18	3	8	4	2	32
E6	8	1	3	1	1	14

- b. Candidates seeking reservation as SC/ST/OBCNC, shall have to produce a certificate in the prescribed proforma (the format can be downloaded from our website <https://www.hrri.in/>), meant for appointment to posts under the Government of India from the designated authority indicating clearly the candidate's caste, the Act/Order under which the caste is recognized as SC/ST/OBCNC and the Village/Town the candidate is ordinarily a resident of. They must also ensure that the name of their caste/community and its spelling in their caste/community certificate should be exactly as mentioned in the lists notified by the central government from time to time (for OBCNC category list of castes recognized by the Govt. of India as OBC castes in the central list is available on the site <http://www.ncbc.nic.in> , for ST category the list of castes for each state is available on the site [www.ncst.nic.in](http://www.ncst.nic.in) and for SC category the list of castes for each state is available on the site <http://www.socialjustice.nic.in> ). A certificate containing any variation in the caste name will not be accepted. Further the OBC certificate should also clearly indicate that the candidate does not belong to creamy layer as defined by the Government of India for applying to posts and services under the Central Government.
- c. The OBC claim of a candidate will be determined in relation to the State (or part of the State) to which his/her father originally belongs. A candidate who has migrated from one State (or part of the State) to another should, therefore, produce an OBC certificate which should have been issued to him/her based on his/her father's OBC certificate from the State to which he (father) originally belongs.
- d. A person who wants to avail the benefit of PwBD reservation will have to submit a disability certificate issued by a Competent Authority as prescribed in RPwBD Act, 2016. Further to this, according to Notification No: 16-15/2010 DD.111 DT.29/07/2013 by Ministry of Social Justice & Empowerment, list of positions/disciplines in which PwBD candidates are eligible to apply for this recruitment drive are given against the vacancies. Appointment in these vacancies will be offered to PwBD candidates after considering the nature of duties & responsibilities of the job, location, hazard, strain & other factors, also considering that the condition is not likely to interfere with the performance of duties of the post with reasonable efficiency and without possible deterioration of his/her health. The final appointment would be based on candidate's medical fitness with respect to job profile of the identified post.
- e. For availing EWS reservation the conditions and format of the certificate will be followed as per DOPT Office Memorandum No. 36039/1/2019 – Estt (Res) dated 31/01/2019.
- f. Maximum age limit is relaxed by 5 years for SC & ST, 3 years for OBCNC, 10 years for PwBD (UR), 13 years for PwBD (OBCNC) and 15 years for PwBD (SC/ST) candidates.
- g. Maximum age limit is relaxed by 5 years for candidates domiciled in Jammu & Kashmir between 01.01.1980 and 31.12.1989.
- h. Age relaxation by 5 years for Ex-servicemen & Commissioned Officers (including ECOs/SSCOs) subject to rendering minimum 5 years' military service and fulfillment of other conditions prescribed by Govt. of India.
- i. The OBC candidates who belong to "Creamy Layer" are not entitled for concession admissible to OBCNC candidates and such candidates will have to indicate their category as Unreserved (UR).
- j. Further the OBCNC candidates will have to give a self-undertaking, at the time of Personal Interviews in terms of DOPT memo No. 36012/22/93-Extt. (SCT) dt. 08.09.1993 if called for, indicating that they belong to OBC-Non Creamy Layer.

- k. If the SC/ST/OBCNC/PwBD certificate has been issued in a language other than English/Hindi, the candidates will be required to submit a self-certified translated copy of the same either in English or Hindi.
- l. Any request for change in category (UR/SC/ST/OBCNC/ EWS/PwBD) once filled in the online application form, will not be considered and accordingly concession/relaxation applicable will not be extended.
- m. Further to this, according to Notification No: 16-15/2010 DD.111 DT.29/07/2013 by Ministry of Social Justice & Empowerment, list of positions/disciplines in which PwBD candidates are eligible to apply for this recruitment drive is given below.
